

REMARKS

The specification has been amended to correct the cross-reference to applicants' parent application. The claim to the earlier application was made based on a temporary application number, and the correct number appears on the enclosed first page of the publication of the PCT application.

Also, page 7 of the application was amended to refer to all drawings that were submitted. Support for this change can be found in the drawing of Fig. 7 that was filed as well as throughout the specification where the various parts of Figure 7 are described.

As no new matter has been introduced, the entry of these amendments would be appreciated.

Respectfully submitted,

9/27/04
